More experienced athletes practice high-intensity courses, bringing the daily dosage to 50-100 mg and giving injections two to three times. The effectiveness of a four to five-week course of Aquatest solo is equivalent to achievements that require the use of testosterone esters over a twice as long period.

The most common use of Aquatest is daily injections. The dosage ranges from 50 to 100 mg per day, which depends on the goal of an athlete. Despite the complaints of some users related to the discomfort of using a water-based suspension, the results of Aquatest are quite impressive. Side effects of Aquatest [homepage](#)
