Averbol 25, British Dragon. Name: Averbol 25 by British Dragon Effective substance: Injectable methandienone (d-bol) Content: 25mg/ml (10ml) Administration: intramuscular injection Inhectable dbol and oral dbol are both fast acting, though because the injectable form does not filter through the liver on the first round, it is faster than the oral form. Averbol 25 British Dragon 10 ml (Methandienone,Dianabol) 250mg/ml quantity. Add to cart. Add to Wishlist. More Info. Methandienone is a derivative of testosterone, exhibiting strong anabolic and moderate androgenic properties. This compound was first made available in 1960, and it quickly became the most favored and widely used anabolic steroid.

Averbol 25 British Dragon (Methandrostenolone / methandienone) is a well-known synthetic injectable steroid. It is widespread in use since a long time by body builders and athletes as it promotes protein synthesis and glycogen breakdown after workouts. Averbol gives immense strength and acts faster than few other steroids.
