That said, I'm giving it a four because the price is so high. In one month (after a total of 12 weeks of usage), I plan to cut down my dosage from 600mg to 300mg so that should help curtail costs. I started with 400 mg/day, then in the second month I began taking 600mg because it was more cost efficient to purchase their 300mg capsules.

In the second test (research study # 2), people were randomized to either provigil ® 0.15-- 0.6 mg/day (n = 132, mean modal dosage = 0.5 mg) or provigil ® 1.5-- 6 mg/day (n = 125, imply modal dose = 4 mg). Etiam posuere [see this](#)
