Equipoise. Updated on 06/01/

2021. Also known as boldenone undecylenate ( $C_{30}H_{44}O_3$ ), Equipoise is a very common anabolic steroid typically used during cutting cycles. It comes in both injectable and pill form, though the injectable version is much more popular. It was first manufactured by Ciba in the 1950s and sold under the brand name Parenabol. [read this](#)
