Testosterone Cypionate is one of the longest esters of testosterone, whose half-life reaches two weeks, which encourages many to put it no more than 1 time per week. In fact, the same Testosterone Enanthate can also be set once a week, but it is better to put both the steroid more often, depending on the total volume of drugs, 2-3 times a week. The bottom line is that rare injections do not. Test Cypionate is the popular steroid for muscle gain cycles: it produces an impressive bulking effect. Due to its use, muscles both increase in size and get fuller. Besides, Test C enhances athletic performance, which allows a consumer to exercise longer and harder. Also, its use increases sexual desire and durability.

Testosterone Cypionate is a slow acting injectable ester of the primary male androgen testosterone. Testosterone is also the main anabolic hormone in men and is the basis of comparison by which all of the other anabolic/ androgenic steroids are being judged. Exactly as with all other injectable testosterone forms, testosterone cypionate is very favored by a lot of athletes because of its.
