Always use clen pills from a reputable maker like Sopharma. Use clenbuterol in cycles of 2 days on/off or 3 weeks on/off. Increase the daily dosage by 20mcg each week, then decrease it by 20 mcg. Do not exceed the maximum daily dosage of 140 mcg for men and 120 mcg for women. Drink 7 to 9 glasses of water per day so your body does not dehydrate. As with most things in life of this nature there is a maximum Clenbuterol dosage we must hold to if safety is going to be upheld. For most men the maximum Clenbuterol dosage will be 140mcg per day while many women will find 100mcg per day to be all they ever need. Women can exceed the 100mcg mark and go as high as 140mcg but this is rarely.

Clenbuterol Hydrochloride is a sympathomimetic that works on the sympathomimetic nervous system. There are several receptors in the body a sympathomimetic can act on. In the case of Clenbuterol, the beta-2 receptor is the area of interest and action. Clen, as it's commonly known, actively stimulates the beta-2 receptor.

Clenbuterol isn't approved for use in the U.S. but is used in other countries to treat asthma. People illegally use it for livestock. It's also used off-label for weight loss. [visit homepage](#)

If Liquid Clenbuterol dosage is the same as the solid form one, then the individual response to both forms will be the same. Now, let's call to mind a fact that we all know as well. To take a stable solid or liquid form, a given substance needs the help of other substances - and the helpers differ in each of the cases. Clenbuterol Side Effects. A case study has reported that the ingestion of 20 μg of clenbuterol (which is the lowest reported dose of clenbuterol exposure leading to toxicity) results in tachycardia (rapid heartbeat), electrolyte imbalance, nausea, vomiting, anxiety, and increased blood pressure (10).

Clenbuterol is a steroid-type drug that is used for veterinary purposes and, in some countries, to treat asthma. In the United States it is not approved for human use. However, many people use. [our website](#)
