Testosterone Cypionate is a single-ester, long-acting form of testosterone. Due to the length of its ester (8 carbons) it is stored mostly in the adipose tissue upon intra-muscular injection, and then slowly but very steadily released over a certain period of time.

Cypionax is the brand name of Testosterone Cypionate made by Body Research, a trusted manufacturing company in Thailand. This intramuscular injectable form of steroid is a single ester, long-acting form of testosterone.

Is Cypionax a true anabolic androgenic steroid? Yes, it's testosterone cypionate, but sold by underground labs under the name "Cypionax". In the past, it was manufactured by Body Research and available in packages containing 10 vials - each of those containing 200 mg of testosterone cypionate.. The product is no longer available in many countries, and verifiable information about the. [additional reading](#)

Testosterone Cypionate is a synthetic version of the naturally produced testosterone hormone. This hormone is responsible for many different physical and mental characteristics in males. It promotes sex drive, fat loss, helps with gaining and maintaining lean muscle mass, increases bone density, and may even protect against heart disease.

Description: Testosterone Cypionate (Cypionax) is a single-ester, long-acting form of testosterone. Due to the length of its ester (8 carbons) it is stored mostly in the adipose tissue upon intra-muscular injection, and then slowly but very steadily released over a certain period of time. A peak is noted after 24-48 hours of injection and...
