Table of Contents 1 About Testosterone 2 About Dianabol 3 Cycles and Dosages 4 Conclusion 5 Forums
About Testosterone Testosterone is a hormone found in all humans. It is made in the testicles by men and in much smaller amounts in the ovaries by women. Furthermore, it is responsible for the growth and maintenance of primary and secondary sexual characteristics in males (hair growth on body ... Dianabol has a reduced androgenic nature compared with testosterone due to a slight alteration to the chemical structure of the hormone, but still retains an extremely anabolic effect. In answer to your question at face

value though; The dbol will cause suppression of your natural testosterone production due to the way it interacts with your receptors, however you wont be supplementing with a testosterone base and so, if anything you will have lowered your test levels, not raised them. 6 level 2 <https://aps1.instructure.com/courses/760/pages/test-200-deca-300-300mg-test-300mg-deca>
