Somatropin is a form of human growth hormone important for the growth of bones and muscles. Somatropin is used to treat growth failure in children and adults who lack natural growth hormone. This includes people with short stature due to Noonan syndrome, Turner syndrome, Prader-Willi syndrome, short stature at birth with no catch-up growth, and ... a All unused Norditropin ® products must be refrigerated (36°F to 46°F) prior to first use. Do not freeze and avoid direct light. After first injection, Norditropin ® pens can either be stored outside of the refrigerator (up to 77°F) for use within 3 weeks, or in the refrigerator (between 36°F and 46°F) for use within 4 weeks.
