

Where Can I Buy Genuine Test P 100 mg (1 vial). Order Testosterone Propionate

PHARMA
TEST P100

Testosterone Propionate
100 mg/ml

With a half-life of around 14-15 days, testosterone propionate is a fast-release ester. Excellent for longer cycles without extra subcutaneous water retention. However, it may be also used for bulking purposes. It combines excellently with many other compounds, both oral and injectable/parenteral stack.

WARNING: About 70% of testosterone is converted in the body to estradiol by the aromatase enzyme. Use aromatase inhibitors to prevent possible estrogenic side-effects.
