TURINABOLOS. Chlorodehydromethyteststerone; 10 mg / pill 100; Turinabol is an anabolic steroid, namely, derivative of methandienone. Both steroids are 17-alpha-alkylated; thereby they survive the first pass through the liver and have high bioavailability. In contrast to methandienone it doesn't aromatize and has low androgenic properties. The athlete will certainly not get a puffy look as is the case with Testosterone, Dianabol, and Anadrol 50. The maximum blood concentration of Turinabolos 10 when taking 10, 20 or 40 mg/day is 1.5 -3.5 or 4.5 times the endogenous testosterone concentration (also see Dianabol).

Solo Cycle: For beginners - up to 20-40 mg, for experienced athletes and professionals - up to 100-150 mg per day, and for athletes and athletes experiencing aerobic loads - up to 10-20 mg per day. The duration of the cycle should not exceed 6 weeks. [try what he says](#)

All with the same conclusion, Turinabolos 100x 10mg is one of the most effective anabolic substances known nowadays to mankind. Ask Arni or Coleman they will tell you how it feels to get big on Turinabolos 100x 10mg. Authentic gear for sale online like Oral Turinabol When T-bol was first re-introduced to the market about a decade ago, it was fairly pricey, being sold for as much as \$10 per 10 mg pill. This prevented many BB'rs from administering an effective dose for any reasonable period of time, so most chose to use other orals instead.

Fifty mg per one day - solo cycle most beneficial 4 amateurs or competent athletes. Swallow the pills thrice for 1 day in equal interval, split-up tabs smoothly over a workday. Together with many AS Tbol consumption feels perfect on the dose 30 mg. Steroid quantity is elevated upto sixty milligrams, any time someone practice anabolics.
