Clenbuterol being a fat burner and a close cousin of ephedrine, while Winstrol, a type of steroid, is NOT technically a fat-burning 'supplement', all it does is help you maintain muscle-mass while on a low calorie diet. This is what people don't comprehend about winstrol in general. The Winstrol / T3 / Clenbuterol stack bring a significant fat reduction and thus obtain excellent muscle definition. Liver protection (Liv 52), anti-estrogen (Anastrozol) and PCT (Clomid and Nolvadex) are included in the pack. Winstrol and clenbuterol are 2 cutting compounds that are very popular among gym rats looking to get ripped. Evidence suggests that Zac Efron could've used winstrol when getting into shape for Baywatch. And there's suggestions that Hugh Jackman's also used clenbuterol to get shredded for Wolverine. Clenbuterol is the oral version of Ventipulmin and it is distinguished from all other orals
